Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 112

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not understood how the legs 28,29, fit over the rails since the opening there between is smaller than the rails.

Claims 1-15 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of these claims is indefinite. In claim 1, an apparatus “ for” covering an opening having rails is recited, suggesting that the opening and rails are not being positively recited. However, there are references to the opening and rails that suggest that they may be positively recited. For example, the size of the sheet is defined in relation to the opening. Applicant must make it clear if the combination or sub combination is being claimed. The claims will be addressed as if a combination is claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3634

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3,16,18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Budd.

See sheet 14, support members (edges of the sheet that contact the rails 11), rails 11, carriage 18, reel 22, wheels 20 and guides 20 or 21. What is not shown is the fabric nature of the sheet. However, Budd discloses a synthetic resin sheet material, and it would have been obvious for this material to be of the well known woven resin commonly used in making tarps, such material having advantages.

Claims 1-3,16,18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Budd in view of Lamb ' 801.

Budd is applied here as above. Further, Lamb discloses a cover which further has edge support members in the form of beads, Fig. 3. It would have been obvious to modify Budd to have such edge attachment so as to seal the pool.

Claims 5 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Budd in view of Smith.

The use of spaced supports is well known, as illustrated by Smith at 40. It would have been obvious to provide Budd with such supports to prevent sagging of the covering.

Claims 5 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Budd in view of Lamb and further in view of Smith.

Art Unit: 3634

The use of spaced supports is well known, as illustrated by Smith at 40. It would have been obvious to provide Budd with such supports to prevent sagging of the covering.

Allowable Subject Matter

Claims 4,6-15 and 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
